

# Touchscreen Dispatch Console

## BD-156

The BD-156 is an industrial-grade touchscreen dispatcher designed for unified emergency command and dispatch systems. It features a 15.6-inch touchscreen, a built-in IP phone, and a visual graphical dispatch interface, providing a clear overview of use status and offering efficient dispatch operations for accurate decision-making and rapid command. It offers a comprehensive solution integrating voice broadcasting, intercom terminals, and a multimedia control console (multi-terminal convergence), combining emergency intercom, emergency calls, emergency broadcasting, visual dispatching, real-time recording, video linkage, wireless trunking, alarm linkage, and electronic maps. It supports multi-level architecture management and meets the needs of various scenarios, including highways, unmanned operations, industrial enterprises, power, metallurgy, rail transportation, petroleum, coal, mining, and smart cities.

## Highlights

- ☑ Equipped with an industrial-grade handle and a gooseneck microphone with high-definition sound pickup, it brings a more convenient and smooth operating experience to the management center.
- ☑ The BD-156 is equipped with a 4x4 industrial-grade keyboard, which includes 4 customizable keys that can be flexibly defined according to the user's actual application scenarios.
- ☑ The BD-156 is equipped with a non-slip adjustable stand, which allows for multi-angle adjustment of the device up and down
- ☑ The KN-156 supports Windows 10 and Linux systems by default

# Detailed parameters

Product Model	BD-156
operating system	Windows 10 64-bit
CPU processor	Quad-core
Memory	8G
Storage	128G SSD
Display screen	15.6" capacitive touchscreen
USB interface	2
Network interface	3 RJ45 ports
Wi-Fi	Includes your own USB wireless network card.
Headphone jack	3.5mm
HDMI interface	1
Power switch	1 button
Gooseneck	support
Power adapter	Input: AC100-240V Output: DC12V/10A
Dimensions (main body)	570*272*82mm
Weight	7kg
